

Docket No. 0435.092A
U.S. Serial No. 10/799,818

Amendments to the Claims

This listing of claims will replace all prior versions and listings, of claims in the application:

Listing of Claims:

1. *(Previously Presented)* A pallet comprising:

a load-bearing deck;

bearer members for supporting said deck, one of said bearer members being located at a side of said deck and comprising a cavity receiving a load-infestation monitoring device;

said load-infestation monitoring device located beneath the load-bearing deck and accessible from a side of the pallet.
2. *(Original)* A pallet according to claim 1 wherein the load-infestation monitoring device is configured to provide a visible indication of infestation.
3. *(Original)* A pallet according to claim 1 wherein the load-infestation monitoring device comprises a lure for attracting a pest of a type known to cause infestation.
4. *(Cancelled)*
5. *(Original)* A pallet according to claim [[4]] 1 wherein the recess is provided with a cover to provide a chamber within which the load-infestation monitoring device is located.
6. *(Original)* A pallet according to claim [[4]] 1 wherein the load-infestation monitoring device is configured to push fit into the recess and to be retained in said recess by an interference-fit.
7. *(Original)* A pallet according to claim 1 wherein a pressure-sensitive or peelable adhesive is used for assisting retention of the load-infestation monitoring device in place.
8. *(Original)* A pallet according to claim 1 wherein a releasable mechanical fixing is used for assisting retention of the load-infestation monitoring device in place.
9. *(Original)* A pallet according to claim 1 further comprising a load-condition monitoring device.

Docket No. 0435.092A
U.S. Serial No. 10/799,818

10. *(Original)* A pallet according to claim 1 wherein the monitoring device itself is adapted to release a replaceable part or disposable detection medium.
11. *(Previously Presented)* A pallet comprising:
- a load-bearing deck;
 - bearer members for supporting said deck; and
 - an integral load-infestation monitoring device integral to one of said bearer members and located beneath the load-bearing deck and accessible from a side of the pallet.
12. *(Previously Presented)* A method of monitoring the quality of goods susceptible to infestation, the method comprising:
- providing a pallet comprising at least a load-bearing deck and bearer members for supporting the deck;
 - locating a load-infestation monitoring device in a cavity of one of the bearer members at a side of, and beneath the load-bearing deck, and accessible from a side of the pallet for inspection purposes;
 - loading the goods on the pallet, and periodically inspecting the load-infestation monitoring device for evidence of infestation.
13. *(Original)* A pallet according to claim 2, in which the load-infestation monitoring device comprises a lure for attracting a pest of a type known to cause infestation.
14. *(Original)* A pallet according to claim 2 wherein the accessible component comprises one of the bearer members which is provided with a recess or compartment that is accessible from an exposed end-face or side of the bearer member.
15. *(Original)* A pallet according to claim 3 wherein the accessible component comprises one of the bearer members which is provided with a recess or compartment that is accessible from an exposed end-face or side of the bearer member.
16. *(Original)* A pallet according to claim 5 wherein the load-infestation monitoring device is configured to push fit into the recess and to be retained in said recess by an interference-fit.
17. *(Original)* A pallet according to claim 2 further comprising a load-condition monitoring device.

Docket No. 0435.092A
U.S. Serial No. 10/799,818

18. *(Original)* A pallet according to claim 3 further comprising a load-condition monitoring device.
19. *(Original)* A pallet according to claim 4 further comprising a load-condition monitoring device.
20. *(Original)* A pallet according to claim 5 further comprising a load-condition monitoring device.
21. *(Previously Presented)* The pallet of claim 1 wherein said load-infestation monitoring device comprises a transparent side to allow an observer to view an interior thereof.
22. *(Previously Presented)* The pallet of claim 11 wherein said load-infestation monitoring device comprises a transparent side to allow an observer to view an interior thereof.
23. *(Previously Presented)* The pallet of claim 12 wherein said load-infestation monitoring device comprises a transparent side to allow an observer to view an interior thereof.
